GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockpounds Constructed Prior to 1969"

"Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

S 2336

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Clara B Rutherford  
Address 33195 Success Valley Dr, Porterville Calif,  
B. Name of body of water at point of diversion Unnamed spring  
Tributary to Unnamed stream thence South Fork Tule River  
C. Place of diversion NE SE 1/4 Section 6, Township 22S, Range 29E, MD 224  
CLARE mty, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmark

D. Name of works

E. Capacity of diversion works

Capacity of storage reservoir 1000

cubic feet per second  
gallons per minute  
gallons  
cubic feet

State quantity of water used each month in gallons or acre-feet

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2000	2000	2000	2000	3000	3000	3000	3000	3000	3000	3000	2000	2000	365000

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as  
acres of each crop irrigated, average number of persons served, number of stock watered, etc. Number of  
livestock will never be the same, this is an average,

Maximum annual water use in recent years 500000

gallons  
cubic feet  
cubic feet  
cubic feet

Minimum annual water use in recent years 365000

Type of diversion facility gravity, pumps

Method of measurement electric power meter, water meter, estimate

F. Purpose of use (what water is being used for) Livestock,  
This spring is boxed in, and there is no run off.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)

So 1/4 Sec 6 - Tow 22 N 29 - Md

H. Year of first use is nearly as known About 1900.

I. Name of person filing statement Clara B Rutherford

Position owner

Organization

Address 33195 Success Valley Dr, Porterville Calif,

I certify that the foregoing statement is true and correct to the best of my knowledge and belief.
